| 364.2                                                                                                                                                                                                                                                                                                                                                                                                                                            | -                                                     | -                           | -     | -                   | -                           | -                 | 57.5  | 54.0                | -                 | 58.5                | 63.1                        | 60.6              | 364.2             |                                              |
| 370.7                                                                                                                                                                                                                                                                                                                                                                                                                                            | -                                                     | -                           | -     | -                   | -                           | -                 | -     | -                   | -                 | 52.7                | 56.7                        | 54.2              | 370.7             |                                              |

 0 lb    143,300 lb    275,600 lb    363,800 lb    452,000 lb    540,200 lb    628,400 lb    716,600 lb

LVSL\_1:  36.1 ft – 62.3 ft

LVSL\_3, LVSL\_4:  36.1 ft – 68.9 ft

LVSL\_3 + LVSL\_4:  496,100 lb +  110,200 lb

Ratings are in compliance with ISO 4305.

Lifting capacities do not exceed 75% of tipping load.

Weight of hook blocks and slings is part of the load, and is to be deducted from the capacity ratings.  
Consult operation manual for further details.

**Note:** Data published herein is intended as a guide only and shall not be construed to warrant applicability for lifting purposes.  
Crane operation is subject to the computer charts and operation manual both supplied with the crane.

In some instances the superlift counterweight does not lift off the ground with the indicated load.

### Crawler carrier

3-section carrier comprising of carbody and two crawlers. Hydraulic pin connections between crawlers and carbody provide for easy assembly and removal to minimise width and weight for transportation.  
Track width: 27.6 ft.

#### Carbody

Bending- and torsion-resistant welded structure of box type construction, fabricated of high-strength fine grain structural steel.

#### Crawlers

Bending-resistant welded structure of high-strength fine grain structural steel. Automatic centralised lubrication is included as standard. 16 rollers on each side frame with hardened rolling surfaces. Raised position for both drive sprockets and idler wheels, drive sprockets and idler wheels provide load bearing capacity for erection, adjustable track tension. Crawler pads: 4.9 ft wide.

#### Crawler drive

The tracks are powered by one hydraulic motor each through closed planetary gear reduction units running in oil bath, equipped with spring-applied hydraulically released holding brakes; the gear units are of very compact design to fit within the width of the crawlers. Each crawler is infinitely variable controlled, both independently and in opposite direction. Tractive effort: 315 kip per side.

#### Assembly jacks

Four hydraulic jacking cylinders on carbody (folding within 9.8 ft width) for easy assembly of crawlers.

### Superstructure

#### Counterweight

452,000 lb (max. 496,100 lb) counterweight on superstructure combination with 110,200 lb central ballast. Steelbox type. Weight of counterweight blocks: 22,050 lb.

#### Total weight

Approx. 860,000 lb, incl. 363,800 lb counterweight, 78.7 ft SH\_1 boom and hook block.

#### Travel speed on crawlers

Max. 0.68 mph.

#### Reeving winch

Mounted on superstructure.

#### Frame

Torsion-resistant welded structure fabricated of high-strength fine grain structural steel.

#### Slew ring

Triple-row roller bearing slew ring with external ring gear for ease of service and maintenance. Central lubrication system.

#### Drive

Pump distribution gearbox with five variable displacement axial piston pumps, and gear pumps. Silencer with spark-arrestor. Sound insulation covering. 6 cylinder Mercedes-Benz diesel engine type OM 471 LA. Output: 390 kW (523 HP) at 1700 1/min, torque 2460 Nm at 1300 1/min each. The engine complies with emission standard EU Stage IV / EPA Tier 4f regulations. The system is equipped with Ad-Blue and a SCR catalytic converter.

**Optional for non-regulated markets:** 8 cylinder Mercedes-Benz diesel engine type OM 502 LA.

Output: 405 kW (543 HP) at 1800 1/min, torque 2600 Nm at 1300 1/min each. The engine complies with emission standard EU Stage III A / EPA Tier 3 regulations. Fuel tank capacity: 317 gallons.

#### Rope drums

The standard superstructure equipment includes three rope drums – hoist 1, 2 and boom hoist. The drums are powered by hydraulic motors through closed planetary gear units running in oil bath. All rope drums have spring-applied, hydraulically released multi-disk brakes and non-wearing hydraulic braking for load lowering. Rope ends H 1, 2, 3 and W 1, 2 equipped with quick-connect rope end-fittings. All winches are removable to minimise weight for transportation.

#### A-frame

Hydraulic raising systems for A-frame as standard. A-frame, boom hoist and sheave sets for boom hoist can be dismantled as one single transport unit to minimise transport weight. Dismantling of hoist 1 and 2 possible without removing A-frame first.

#### Slew unit

Powered by hydraulic motors through 2 closed, planetary gear units running in oil bath. Spring-applied, hydraulically released holding brakes and non-wearing hydraulic braking. Slew speed infinitely variable 0-1 rpm.

#### Control system

IC-1: Electronic proportional valve pilot control integrated in stored-program control system incl. diagnostic system. Two monitors with colour displays, load moment indicator operated via a touch screen. Working speeds infinitely variable controlled by the lever position. Automatic power control for optimal utilisation of engine output; emergency control systems.

Additional functions:

- Infinitely variable position of Superlift counterweight with the optional adjustable Superlift system 36.1 ft - 62.3 ft
- Infinitely variable position of main boom angle in SWSL configuration 55-87° (65-87° in SW configuration)
- Working area limitation
- Diagnosis and troubleshooting
- User defined joystick mode

The crane is controlled by joystick levers ergonomically positioned in the crane cab. Wireless rigging remote control. Wireless emergency remote control.

#### Cab

Comfortable cab with large windscreen and air condition. Shatterproof-glazing all around, roof window, self-contained hot air heater, full instrumentation and crane controls. Infinitely adjustable operator seat, emergency seat, multiple storage areas, 12-V power plug. The cab can be tilted back for improved operator view of boom point. A camera system is installed to monitor the rope drums. Front window can be opened. Dashboard can be adjusted for optimum ergonomics and view. Front wiper with resting position outside of window area for optimum view. For transportation, the cab swings hydraulically in front of the superstructure to minimise width.

#### Electrical equipment

24 V DC. system (2 x batteries 12 V, 200 Ah).

#### Operator aids

Load moment indicator integrated in IC-1 control (load moment, radius, angles, engine and hydraulic system monitoring), hoist limit switch, limit switches for boom movements, hydraulic boom backstop, position light, anemometer.

## Boom Combinations

See page 14-21.

## Optional equipment

### Hydraulic quick connection

**Crawler pads** 6.6 ft.

**Quadro drive** 2 drives for each crawler carrier 585 lbf tractive force – at reduced drive speed.

### Alternative counterweights made of cast iron

**Alternative counterweight segmentation**  
22,050 lb + 16,540 lb or  
22,050 lb + 33,080 lb

**Hydraulic cylinder on A-frame** For self-assembly of crawler carrier.

**Hydraulic cylinder with or without hydraulic unit** For boom pinning.

**Additional lateral outrigger system** For erection of long boom systems.

**Boom Booster Kit** Consists of 2 x 39.4 ft adapter sections and up to 7 x 39.4 ft inserts.  
Available in length 78.7 ft, 157.5 ft, 196.9 ft, 275.6 ft, 354.3 ft.  
Extension of Superlift mast from 118.1 ft to 129.6 or 137.8 ft.

**Flex frame** Infinite positioning of Superlift counterweight from 42.6 ft – 68.9 ft.

**Split tray** Superlift tray frame with removable platform underneath the center stack of counterweights (center stack max. 275,600 lb).

**Standard SL** 118.1 ft Superlift mast incl. hoist W2.  
SL pendant bars, mast back stop cylinders, SL tray.  
Superlift counterweight 0 lb at radius 29.5 ft or 0 lb – 716,600 lb on counterweight tray at fixed radii 36.1 ft, 42.6 ft, 49.2 ft, 55.8 ft and 62.3 ft.

**Variable SL** Variable 118.1 ft Superlift mast (see Standard SL).  
Additional vertical hydraulic cylinders and stabilisation winch on superstructure (prevents weaving of counterweight especially when traveling and slewing). Height compensation using the cylinders, lifting across obstacles possible to a certain extent. Superlift counterweight 0 lb at radius 29.5 ft or 0 lb – 716,600 lb on counterweight tray, indefinitely variable from 36.1 ft – 62.3 ft.

**SL counterweight carrier** Superlift mast (see Standard SL). Telescopic frame and counterweight carrier for total weight of 716,600 lb, with 4 wheels / 2 axles (driven and steered – full manoeuvrability for slewing, trailing, and parallel modes). Superlift counterweight 88,200 lb – 716,600 lb on counterweight carrier with fixed mast radius approx. 52.5 ft; infinitely adjustable from 42.6 ft – 55.8 ft or 55.8 ft – 62.3 ft resp. with telescopic frame. The counterweight carrier allows for traveling or slewing even when the Superlift counterweight does not lift off the ground (e.g. crane with loads as indicated by load chart values in brackets).

**Hoist H3** Additional hoist for main boom (to operate LF or runner), line pull same as H1, length 2133 ft.

**Runner** Max. lifting capacity 119,100 lb. Mounted on boom head and boom / jib top. Operation by hoist rope 3 (see variable SL).

**Runner for LF standard** Max. lifting capacity 39,700 lb. Operated by rope 3.

**Special LF linkage head** Without sheave set for higher lifting capacities when using LF.

**9.8 ft intermediate section** For 9.8 ft intermediate lengths.
